

The Education Sage's Learning Assessment Tools

For Students in
Grades 5 through College

Discover:

- ✓ A Student's Learning Issues
- ✓ A Student's Learning Techniques
- ✓ How to Get Intervention Help
- ✓ How to Advocate for a Student

This interactive workbook consists of two parts: The ESALI™ and the ESALT™.

The ESALI™

The ESALI is the Education Sage's Assessment of Learning Issues. This tool helps identify the learning issues a student is experiencing.

The information collected will help explain why a student is struggling in a learning environment. Most of the time, issues are uncovered that parents and teachers have missed.

The ESALT™

The ESALT is the Education Sage's Assessment of Learning Techniques. This tool helps to identify which learning techniques or styles and which learning processes a student is using in different learning situations.

The information given by the student will help explain why the student is struggling with learning any material on a permanent basis.

Why do you need these tools?

- They are faster than traditional testing—ready to use when you are.
- They are more economical—save hundreds of dollars over testing done outside of school.
- They give immediate, specific results—teachers can use them to help your student.
- They help empower your student-give the knowledge of how he/she learns best.
